Hippocrates Health Institute’s (HHI) New Premier Program, The Comprehensive Cancer Wellness Program (CCWP) is an enhanced addition to its’ Signature “Life Transformation Program” which provides the fundamental training & a definitive blueprint for transitioning to a healthier lifestyle. The CCWP is designed for individuals with Cancer wanting to optimize wellness & learn preventative self-care with integrating natural holistic therapies. This Program is intended to be an adjunct to standard medical treatment for people wanting to include additional integrative & holistic therapies as part of their “Wellness Care” in their recovery.

The premise of the program is that individuals with cancer are dealing with systemic and metabolic imbalances that include:

1.) High Levels of Toxicity
2.) Sub-Optimal Nutrition
3.) Hormonal Imbalance———Especially with the Adrenal Glands
4.) Low Energy
5.) Emotional Distress
6.) Confusion About What is Needed to Win the Battle with Cancer

Simply put, there is a tug of war in the body between the energy of the cancer & the energy of the body. The traditional approach to cancer therapy is to reduce the energy of the cancer through surgery, radiation, & chemotherapy. This treatment, which will kill cancer cells, will also weaken the energy of the body, & usually result in an even higher level of toxicity, due to the increased demands placed on the liver.

The HHI CCWP is designed with a comprehensive integrative approach to increase the body’s energy, optimize nutrition, reduce toxicity, enhance metabolic balance & maximize one’s ability to deal with stress by introducing specific strategies for mastering emotional management & tapping into the power of the mind & brain to influence & up regulate the immune system & mobilize other healing systems of the body.

Participants learn how to maximize their “Personal Power” with Making a Conscious Decision to “Get Well” & “Designing a Compelling Future” to Transform their Life to Promote Long Term Wellness.

Dr. Hranicky’s passionate interest is in the area of BioEnergy Field Medicine and Integrative BioPhysics. The growing field of Quantum Medicine enables us to look at the human body as an electrical/electromagnetic system which is charged and which charges the larger Quantum Field. Emotions carry charge and charge is the agency of change within matter. It has been Dr. Hranicky’s clinical observation that these “emotional” disturbances precede the development of cancer. Changes in consciousness and one’s emotional state shift the BioEnergy Field which can alter the course of disease. She believes that Spontaneous Remission is correlated to the changes in the vibrational frequency of a person’s BioEnergy Field that happen when healthy shifts occur in the strength, coherency, and flow of one’s emotions and energy that impact a desirable movement toward Parasympathetic/Sympathetic balance.

Dr. Hranicky is honored to support the on-going work of her courageous mentor, O. Carl Simonton that is being done at the Simonton Cancer Center. She has seen in her clinical research over the last thirty years of pioneering the field of Stress, Psychological Factors, and Cancer with Dr. Simonton that the significance of healthy emotional change is profound in up-regulating the vitality of our natural healing properties that are designed within us to alter the course of cancer towards health and long-term survival.

Dr. Hranicky trained with the late Dr. Valerie Hunt, U.C.L.A. Professor Emeritus in the area of BioEnergy Field Medicine over the last 15 years. Dr. Hranicky is currently involved in ongoing clinical research with the Comprehensive Cancer Wellness Program in alliance with the BioEnergy Fields Foundation founded by Dr. Valerie Hunt, The American Health Institute and Hippocrates Health Institute.
